

TASHMEET SINGH KATARA

tashmeetkatara@gmail.com | LinkedIn | GitHub | Portfolio

Education

Bachelor of Technology in Electrical Engineering
Delhi Technological University (DTU) — CGPA: 7.6

2027
New Delhi, India

Professional Experience

AlliedVista Consulting

HR Consulting & Talent Solutions

Business Consultant Intern

May 2026 – Present

- Conducted B2B client outreach via Apollo.io and LinkedIn, leveraging CRM tools and structured data sheets to track lead pipelines, analyze client needs, and drive business development.
- Aperture Partnership:** Spearheaded a B2B cold-calling campaign to interior design firms, achieving an 80% success rate against a weekly KPI of 5 client demos.
- Translated business requirements into targeted hiring strategies with hiring managers, exceeding placement KPIs by 50–100% (3-4 hires vs. a target of 2).

Public Works Department (PWD)

Government Infrastructure & Public Works

Operations Intern

Jun 2025 – Jul 2025

- Coordinated operational oversight of an 11kV/415V substation and audited end-user grievance workflows, gaining hands-on exposure to infrastructure administration in a government setting.

Projects

RecruitIQ

AI-Powered Candidate Intelligence System | AI, Data Analytics, SQL & Power BI | GitHub

- Designed a full-stack recruitment intelligence platform to capture applicant interactions, resumes, and recruiter notes in a normalized relational SQL database.
- Built a multimodal AI extraction pipeline (Gemini) to convert unstructured resumes, chat notes, and voice recordings into structured hiring preferences, enabling reuse across 22+ job openings.
- Architected the schema to scale to 250+ profiles, integrating with Power BI to visualize pipeline metrics and sourcing insights.

Smart Traffic Management System

Computer Vision, IoT, Process Optimization | Hackathon Winner (IIITD) | Pipeline

- Developed an AI-powered computer vision model to analyze real-time vehicle density (cars/trucks), dynamically manipulating traffic lights to minimize lane congestion.
- Engineered a secure, RFID-based priority-access framework that overrides sequential traffic signals for emergency vehicles, featuring encrypted data protocols and a proposed UHF FASTag integration for 15-meter early detection.

Telegram Math Solver Bot

Python, Selenium, Process Automation, Logic Engineering | GitHub

- Built a web-scraping bot to solve real-time math puzzles from a competitive multiplayer platform, automating HTML data extraction and answer submission to consistently top group leaderboards.

Core Skills

Programming	Python (Pandas, NumPy, Selenium, Matplotlib, Scikit-learn, TensorFlow), SQL, MATLAB, Git
AI & Analytics	LLMs, Prompt Engineering, Semantic Search, Data Visualization, Power BI, Excel
Databases & Technical	PostgreSQL, MongoDB, Database Design, REST APIs, React, Node.js, Express, Data Scraping
Business & Leadership	Business Development, Requirement Gathering, Stakeholder Management, CRM Administration, Team Leadership

Position of Responsibility

Semicon

Semiconductor Society, DTU

Public Relations Director

Sep 2025 – Present

- Grew outreach initiative from a single-event pilot to leading a 10-member team across multiple flagship events (semiXthon, Invictus, VDSemiX), scaling registrations to 900+.
- Lead a 10-member team, overseeing logistics, event outreach strategies, and resource allocation to maximize campus-wide visibility and engagement.
